

# EXTREME Learning with EXTREME Collaboration

Making the SMART Board experience collaborative.

## SMART Extreme Collaboration Koosh Ball Activity

1. Start by going to the SMART Exchange Website.

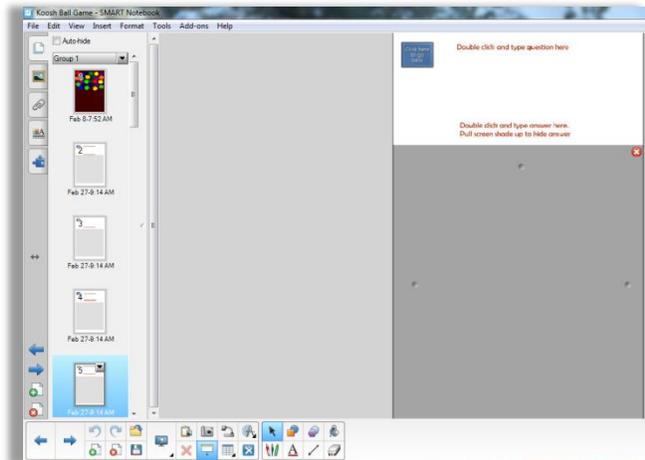

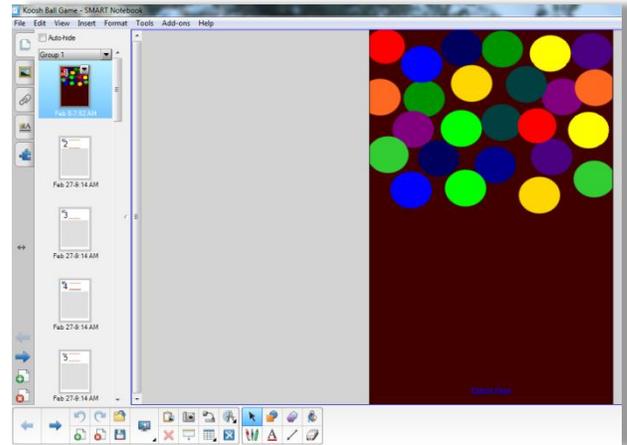

2. Find the Koosh Ball Activity, there will be multiple different types of activities so choose the one that suits your needs. The first one is a blank template that you can easily set up to look as you wish or you can choose a premade option.

3. **Save** the file to your computer in a place that is easy to access and then **Launch** the program.

4. The activity will open in SMART Notebook. There are pages which link to each circle on the board that will house your questions, each of these pages are editable.

5. To make changes to the questions simply go to the next slide and enter the question you would like to use. Also make any changes necessary to the formatting of the slides such as colour, text ect.

6. Once you have edited the slides follow the steps to starting XC and then you can allow students to respond to the questions during the Koosh Ball Activity using XC.

*Note: You can pause the activity in between questions so that students will not be able to continue sending messages during the game.*
