Collaboration

Making the SMART Board experience collaborative.

SMART Board Interactive Whiteboard Basics

INSTALLATION

1. Connect your SMART Board interactive whiteboard system to a computer with a USB cable.
2. Plug the SMART Board in to a wall outlet.
3. Connect the computer to a projector with a VGA cable.

SAFETY

- The projector beam is bright. Do not look directly at it!
- The projector can get hot. Do not touch it while it's on.
- Do not use a chair to increase a student's reach.
- Do not allow students to run where they might trip over cords or the floor stand; tape down cords.

FUNCTION

Anything you can do on your computer, you can do on a SMART Board interactive whiteboard.

- A press with your finger is the same as a mouse click.
- Durable surface; touch with intent for continuous writing.

CONTROL TRAY AND BUTTONS

1. You can write with your finger or a pen. The pen tray has sensors. Pick up the colour of pen that you want to use as digital ink, and start writing.

2. Pick up the eraser from the pen tray and move it in a smooth motion over your notes to erase them.

3. You will notice two other buttons on the Control Tray:
- a. The Keyboard Button – press it to access the on-screen keyboard.
 - b. The Right Mouse Button – serves as a right-click.

ORIENTATION/CALIBRATION

1. Press and hold the Keyboard and Right Mouse buttons simultaneously until the Orientation Screen appears.

2. Begin the orientation process at the upper-left corner of the Orientation Screen. Press your finger or pen firmly on the center of each cross in the order indicated by the white, diamond-shaped graphic.
